Skills Summary

Web Development

- Developed **RESTful APIs with User/Admin authentication** using Node.js, Express, and MongoDB
- Built and designed **React web applications** and **integrated** them to the developed APIs
- Completed Full-Stack Applications using the **MERN stack**
- Designed and produced a **portfolio website** that has a **functioning Contact Form** that sends email
- **Deployed and hosted web applications** using services such as AWS EC2, Render, Cyclic, and Vercel

Languages and Systems

- Frontend — React.js, CSS, JavaScript, HTML, Bootstrap
- Backend — Node.js, Express, JavaScript, PHP, Laravel
- Database — MongoDB, MySQL, DynamoDB
- Cloud Computing (AWS) — S3, EC2, Lambda, API Gateway, DynamoDB, SNS, SES, SQS
- Version Control — Git, GitHub, GitLab

Projects

Fullstack Ecommerce Web Application   Github Link *w/ Live Demo*

Creator, Developer, Designer

Technologies used: *React, CSS, JavaScript, Node.js, Express, MongoDB*

- Used *React Router v6* to create private and public routes based on user roles and permissions
- Managed complex states of shopping cart by utilizing react's 'useContext' hook
- Applied the *dotenv* npm package to separate sensitive data and information out from the raw code
- Managed the user role's state across the app using the browser's local storage data and the '*useContext*' hook
- Made an Admin dashboard with functional features — add, edit, archive, activate product, set admin, view orders
- Utilized the react hook 'useEffect' to fetch data from the API or the local storage once a component renders
- Built my own 'view product' modal that retains previous route as background, using '*useLocation*' hook

Fullstack Course Booking Web Application   Github Link *w/ Live Demo*

Creator, Developer, Designer

Technologies used: *React, Bootstrap, CSS, Node.js, Express, MongoDB*

- Applied *Bcrypt* algorithm to hash and store user password securely
- Utilized JSON Web Token (JWT) as an access token to authenticate users to make authorized requests
- Used Express with Node.js to create a backend REST API that performs CRUD functionalities
- Implemented user registration, authentication, and user enrollment functionalities

Education

Zuitt Learning Institute, Inc.
Amazon Web Services Cloud Training
June 2023 - July 2023 **[Certificate/s]**

Zuitt Learning Institute, Inc.
Full-stack Web Development Program
January 2023 – April 2023 **[Certificate/s]**

Zuitt Learning Institute, Inc.
MySQL-PHP- Laravel Course Program
May 2023 - June 2023 **[Certificate/s]**

Batangas State University
BS in Petroleum Engineering
Graduated: December 2020
